Home Fire Sprinkler Systems Save Lives and Property

In October 2010, the National Fire Protection Association announced the Faces of Fire campaign, which is a tool to promote the **required** installation of fire sprinkler systems in all new one and two-family homes. "Home fire sprinklers save lives, protect property, preserve community resources, and are affordable in new construction." Many people building homes today are not aware that fire sprinklers are an option. As more families realize that home sprinklers are both accessible and cost effective, they will become commonplace.
